THE UNIVERSITY OF SCIENCE AND PHILOSOPHY NEWSLETTER – ISSUE #5

*"God gave dominion over the earth to all men, but He did not give dominion over man to any man.
~Walter and Lao Russell, from The World Crisis*

Twin Opposing Vortices

The Revival of Russellian Science

By Matt Presti – President, USP

Greetings fellow students, alumni, directors and friends:

The USP wishes all of you a very productive and active Spring Season. This year has been dubbed “the year of demonstration” here at the USP. With the growth of spring upon us, the Science and Research Committee is moving ahead with our mission objectives to demonstrate many of the principles of Dr. Russell’s scientific knowledge to the world. We have a great Committee of folks participating and are making slow but sure progress. With our [fundraising effort](#) now underway, we will continually make greater strides. Since the beginning, everyone involved with this Committee has been volunteering for this tremendous effort. Thanks to each of you for your continued participation and support. We will soon be making an Official Press Kit available for media and other interested organizations. Stay tuned.

The philosophy as well the science of Walter and Lao Russell have each maintained and held interest in a broad spectrum of students over these many long years. The true student/teacher of this University and curriculum KNOWS there is no science without the philosophy and no philosophy without the science. The process of thinking and our conceptions of matter constitute the philosophic end of the piston stroke while the action of matter manipulation and alteration is the scientific end of that piston stroke. Like a complete breathing cycle, you cannot have inhalation without exhalation. If we do not perceive the role and responsibility of KNOWING Mind when it comes to how we manipulate matter, the results can be disastrous as we see unfolding over and over again in our so-called “advanced” scientific world. The beauty of Walter and Lao Russell’s science and philosophy working as one, demonstrates to all of us, the power of sacred male/female balance which constitutes this entire Creation. When one achieves balanced thinking (philosophy), the end result is a balanced action (science). The FULCRUM of KNOWING Mind is the power source for both of these. Our thinking crystallizes into form. Our created bodies reflect our thinking in this Mind-Wave Universe. Love is the foundation of this Universe of seeming motion. Without love in one’s actions, chaos ensues. Our Science and Research Committee understands full well, the importance of having and maintaining a balanced approach to each goal we set. We employ all we have learned in keeping with principle as the Russell’s would have desired. To meet our goals and maintain upstanding character in our efforts is primary. To all of you who have given generously to our efforts, we wish to say thank you. Each one of us is committed to a better tomorrow through balanced thinking in action today!

The USP would like to send a big thank you to our shipping manager, [Cindy Lewis](#). She has consistently and without fail upheld the highest standards when it comes to shipping the Russell teachings around the world. We truly appreciate you Cindy for all the wonderful and hard work you do!

Recent events to share include Darren Colomb, our lead scientist and myself, took part in a presentation concerning the ongoing Radiation Remediation effort currently underway within a large collective partnership which is addressing the very real dangers of the continued use of nuclear power around the world, especially regarding Fukushima. To view our presentation, click [here](#). We also appeared on Op-Think Radio which you may listen to [here](#).

There are so many great things yet to come and we are actively working on many fronts within the USP, scientific advancements, [article scanning](#) and release, more [fulcrum magazine](#) issues being scanned, an upcoming conference in Virginia, a meet-up in Missouri and so much more. Stay tuned to our social media stations for more information. Click on the picture links to the left of each page for more as well.

In closing, I'd like to remind all students, old and new alike, of one small piece of advice the Russells gave us, in particular this quote; "There are no *accidentally* great people." By extension, there will be no *accidentally* great neighborhoods, great nations or a great world unless great people help to build it. In my mind, what matters most to me is [Character](#). For without character, no world, nation, neighborhood or home will stand for long. We must develop our character and unfold the Divine Mind qualities that each *one* of us possesses. When you find balance within yourself, you can extend that Divine power to your home. When your home reflects that Divinity, you can extend it to your neighborhood. When your neighborhood reflects that balanced Light, you can extend it yet again until that great Light of Balance is reflected the world over. Every beating human heart plays a Divine part in this great play we call - *life*.

May the seeds you sow this spring bear a great fruit in the months to come.

Respectfully and faithfully yours,

Matt Presti - President, USP

Alumni Committee and the IACC Introduction

By, Jeremy Boyer – Secretary, Alumni Committee, USP

Dear Readers,

The Alumni Committee was just recently formed in January of 2016 to help the USP with planning the annual Homecoming, establishing a physical presence through the International Age of Character Clubs and discuss future plans on disseminating the Russell's message just to name a few. The committee is working very diligently to prepare a Homecoming that is masterful in every aspect. This committee is meeting every two weeks to make sure this year will be a year we will never forget. Follow us on [Facebook](#) to keep informed of important announcements relating to the next Homecoming.

What is the International Age of Character Club (IACC) and what is its purpose? The IACC is a place where everyone can come together with loving understanding and comprehend their true purpose on Earth. The IACC can help with understanding one's relationship with themselves, each other and their Creator. Our mission is to assist in the formation of character clubs world-wide through the issuances of OFFICIAL IACC Charters. These chartered clubs can facilitate learning for current students of Universal Law, Natural Science and the Living Philosophy found within Dr. Walter and Lao Russell's Home Study Course. The [IACC Facebook page](#) will offer a platform for questions and answers aiding students of the USP while providing a foundation for a balanced understanding in which Spiritual Cause is primary and physical effect is secondary.

We live in a world today where men and women of character are sorely needed. Today, humanity looks externally to solve their problems instead of looking within. This is perhaps one of the biggest problems our society is currently facing today. People have long put faith in others to solve their problems. Walter and Lao talked frequently about how we are at the 11th hour of our society and how we have to change very soon before it's too late. When each one of us learns to implement our spiritual mind qualities onto the world, we help to better it overall. The balance we create in our own homes extends to the world.

The Russell's founded the IACC to help usher in the needed message of "Character" to the fresh young minds of the future. The Russell's knew the importance of children being raised to know Natural Law. Lao said that "Children should be taught at a very young age that whatever they do to another they are doing to themselves. That is the very principle upon which to found their morality and character. If they understand that they hurt themselves when they hurt another physically, or by unkind words, and understand it as a part of Natural law, that knowledge will become habitual within them." This is something many religions and great spiritual teachings speak about though we still don't comprehend it entirely as a society. We have even become a society that bribes and threatens their children for reinforcement instead of teaching them Natural Law. Children learn their behaviors from what their parents do and not what they say. This is why it is so important to set the example. What is ironic about our society is that it has drifted so far out of balance that doing the right thing is difficult sometimes. The world will change to reflect the thinking of our collective human culture but we have to first start with ourselves then radiate outwards from our home to our neighbors and beyond that which we desire to see the world become.

Be sure to visit the OFFICIAL USP [International Age of Character Club](#) to learn more!

Blessings and best wishes,

Jeremy Boyer – Secretary, USP Alumni Committee, Science and Research Committee
